-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is responsive to the preliminary amendment filed September 12, 2003.

Claim Rejections - 35 USC § 112

Claims 30, 31, 33, 35, 39 and 40-43 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for providing a single needle at the distal tip of the elongate body and rotatable about the longitudinal axis, it does not reasonably provide enablement for a second needle at the distal tip. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to add a second needle to the device to make the invention commensurate in scope with these claims.

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show a second needle at the distal tip of the elongate body and rotatable about the longitudinal axis as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet,

and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 27-28, 32 and 34, 36-38 are rejected under 35 U.S.C. 102(e) as being anticipated by Daniel et al (US Patent 5,709,693). The patent to Daniel discloses a suturing instrument having an elongate body and a distal end with a distal tip 20 having a needle disposed therein and distal end 16 is rotatable about the longitudinal axis.

Claims 27-28, 32, 34 and 36-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Ainslie (US Patent 1,822,330). The distal tip is rotatable about the longitudinal axis at point (9) in figure 1.

Allowable Subject Matter

Claims 29 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 30, 31, 33, 35, 39 and 40-43 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
